Pieces of Training & Certificate

○ *Remote Sensing, Geographical Information System and Global Navigation Satellite System (ISRO):* —   *(2022)*

- The remote sensing and Geographical Information System (GIS) technology combine major database operations like statistical analysis and query, with maps. The GIS manages information on locations and provides tools for analysis and display of different statistics that include population, economic development, characteristics, and vegetation.
- It was conducted by IIRS Dehradun (ISRO). Click to see Certificates
